

Gambling on the Brain

New Perspectives on Brain Science and Gambling Addiction

Participate in this interactive and informative evening and benefit from:

- key perspectives and context on gambling addiction from BC's Provincial Health Officer
- highlights of neuroscience research impacting the decision to recognize gambling as the first behavioural addiction in the DSM5
- information on tools for measuring gambling behaviour and details on warning signs for problem gambling
- plans for the new Centre for Gambling Research at UBC
- information on support services available for individuals and their families.

Bring your questions. A large portion of the evening is devoted to an interactive Q & A session.

Speakers include:

PERRY KENDALL, MD, British Columbia Provincial Health Officer

LUKE CLARK, PhD, Director, Centre for Gambling Research at UBC

MICHAEL KOO, MA, RCC, Provincial Clinical Coordinator,
BC Responsible Gambling Program

ANDRE SERZISKO, Provincial Prevention Coordinator,
BC Responsible Gambling Program

This event is part of the Summer Institute on Addiction.
